MERITS

Victoria's natural talents and unique characteristics.

Friends in High Places

You know many people in the upper echelons of society and may still move among them regularly. Your comfort in those circles makes you adept at navigating their social minefields. You gain **A +1** dice bonus to all social tests, including attacks in social conflict, when dealing with the social elite. You also gain this bonus when you name-drop or otherwise trade on your connections to gather information or to get into a place normally closed off to outsiders.

Activation. When you make such a test, you can activate this [merit] as a reaction for a

basic success. This activation can't be used on a social attack.

CLAN TRAITS

Victoria's supernatural talents, inherited from her blood.

Obedience

Prerequisites: Neonate or stronger. At least 1 dot in Dominate.

You can use your Dominate powers on a target via eye contact, touch, or your voice, instead of the power's normal limits, provided the target is within the power's range. In addition, you can spend 1 Willpower (in addition to the power's normal cost) when you use a Dominate power to transmit that power through an electronic device, such as a microphone, cellphone, or camera, using your voice, provided the electronic device is a live feed and not a recording. You must be able to see or hear each person you are targeting with the power, which can be via an electronic device.

Rationalize

Prerequisites: Neonate or stronger. At least 2 dots in Dominate.

Victims of your Dominate powers believe that anything they do while under the influence of such powers was a result of their own free will, and they defend and rationalize their actions. A close, trusted friend of the victim who presses the victim on the rationalization can prompt them to make a Resolve test against a Difficulty equal to your dots in Dominate. On a success, the victim begins to question itself and its actions. At the Storyteller's discretion, a victim that succeeds on this test multiple times may eventually become suspicious of your involvement in its life, recognizing its odd behavior often happens after interactions with you.

NATURE

Victoria's nature, the mortal impulses at her core, and its associated outburst.

Perfectionist

As a Perfectionist, you demand flawless execution. You expect total commitment to tasks and close attention to detail from yourself and others. You may be exacting, but it is the achievement of your goals that drives you.

Indulging. You throw yourself into a task for hours, until it is exactly the way you want it to be. You criticize others over the slightest mistakes. You pore over your own perceived failings, working out how to correct them.

Perfectionist Outburst: Perfectionism. Nothing is going the way it should, and everything must be perfect. You can't use social Discipline powers, and for the rest of the scene, you must spend each turn redoing failed tasks. If you failed a test on your previous turn, you must repeat that test on your next turn. If you didn't fail a test, you can't simply repeat your last action; instead, you must attempt a test that an ally failed on their previous turn, correcting their mistakes. If neither you nor your allies failed a test on the previous turn by you or your allies (or if a failed test is impossible for you to repeat), you may act freely, but you suffer a dice penalty equal to your generation modifier to all tests, as you are distracted by every imperfection around you.

CLAN ASPECTS

Victoria is part of the Ventrue vampire clan, which comes with great power but also a curse.

Clan Beast: Superior

Your Beast demands loyalty and fealty, deeming your blood to be superior to all others. You satiate it by acting superior, making others obey you, and firmly establishing a hierarchy in which yours is the commanding voice.

Curse: Rarefied Palate

You have rarified tastes, finding only one specific type of mortal blood palatable. Choose a type of mortal, such as soldiers, natural brunettes, teachers, or the wealthy elite. If you can smell a mortal's natural odor or its blood, you can tell whether it fits your preferred type. If you drink from one that doesn't, you must make a Self Control test against a Difficulty equal to twice your generation modifier. On a success, you regain only 1 Vitae for every 3 you drink. On a failure, you vomit up the blood and gain no benefit from the feeding.

Frenzy: Arrogance

When you frenzy, the need to rule rears its ugly head. You stop at nothing to take command of a situation. You strive to make someone obey an order from you, but that order can't be supernaturally enforced, such as through the Dominate Discipline. All your other actions suffer a dice penalty equal to twice your generation modifier. This frenzy can end early if someone who isn't your ally obeys your command without supernatural influence.

Discipline Powers

Victoria's Disciplines are Dominate and Fortitude, which give her access to unique powers.

DOMINATE

Cloud Memory

1-dot Mental Dominate

ACTIVATE	ATTRIBUTE	COST
Action	Intelligence	1 Willpower
DIFFICULTY	DISTANCE	DURATION
Resolve	Short	Permanent

You make a non-animal target forget the present moment and the last few minutes. Make a Power test against the target's Resolve. On a success, the target forgets up to the last 5 minutes (you choose how long). This power doesn't let you see the target's memories; it works more like a blanket wipe of that stretch of time. The target is aware of the gap but not its source.

MATURING

Once you have more than 1 dot in this Discipline, you can use this power in new ways:

- : You can create, change, or remove up to 10 minutes' worth of memories, but all memories must have happened within the last 24 hours. Since you can't read the target's memories, this power resembles blindly painting over an existing canvas, though you can target specific moments, such as "between 10:04 and 10:05 this morning" or "the 2 minutes when we met earlier this evening."
- : You can create, change, or remove up to 1 hour's worth of memories from up to 5 years ago. At this rank, your manipulation is as precise as a surgeon's. While you still can't read the target's memories, you know the general content of the memories you seek to change, and you can make fine modifications, such as replacing one person's face in a memory with another's.
- : You can create, change, or remove up to 24 hours' worth of memories, regardless of how long ago they occurred.

Submerged Directive

2-dot Mental Dominate

ACTIVATE	ATTRIBUTE	COST
Action	Manipulation	2 Willpower
DIFFICULTY	DISTANCE	DURATION
Resolve	Short	Instantaneous or one night

You use your powers of dominance to implant a suggestion in a target's subconscious. You can cause the effect to happen immediately or designate the events that trigger the suggestion's release. You can't force a creature to do something innately against its nature or harmful to it.

Make a Power test against the target's Resolve. On a success, you implant a complex command it must perform immediately, or when the conditions are met. The conditions themselves can't be complex, however, and must be triggered by simple sensory input, such as seeing a particular person, hearing a certain song, or touching grass.

MATURING

Once you have more than 2 dots in this Discipline, you can use this power in new ways:

- : The implanted suggestion can lie dormant indefinitely, activating when the conditions are met.
- : You can affect a number of targets equal to half your dots in this Discipline

Deliver Command

3-dot Mental Dominate

ACTIVATE	ATTRIBUTE	COST
Action	Intelligence	1 Willpower
DIFFICULTY	DISTANCE	DURATION
Resolve	Short	One night

Your power to manipulate the minds of others is now contagious, letting you extend your control through your subjects. Choose a Dominate power you know with a rank at least one lower than your number of dots in this Discipline. You can implant that power into a target you can see within range and have the target deliver that power to another individual. The target of this power doesn't need to know it carries your power.

When you use this power, you must either specify the final target or establish a trigger for when the implanted power is delivered, such as the next person to walk through a particular door, or the first person the subject meets when entering a specific building. You must pay this power's and the implanted power's costs. If the implanted power requires a Power test, you make that test when it is delivered; you know when it is delivered.

MATURING

Once you have more than 3 dots in this Discipline, you can use this power in new ways:

- : The duration becomes indefinite, as the subject carries the implanted power until it can make the delivery or dies.

FORTITUDE

Unswayable Mind

1-dot Mental Fortitude

ACTIVATE	ATTRIBUTE	COST
Minor action or reaction	Composure	1 Willpower
DIFFICULTY	DISTANCE	DURATION
None	Self	One turn

You bolster yourself against attempts to sway you through charm, coercion, and wiles. To activate this as a reaction, you must be the target of a social attack in a conflict or of an effect that would affect your mind or emotions.

For the duration, you gain a dice bonus equal to half your dots in this Discipline to your Social defense tests. This bonus also applies against Discipline powers that would affect your mind, such as those in the Dominate Discipline.
